Title: Resource Usage  
ID: CSR001  
Revision: 2.0

Purpose  
This procedure provides guidance for resource usage for the Computer Science Department.

Scope  
This procedure applies to all resources for the Computer Science Department.

Acceptable Usage Statement  
Users are granted access to computing, networks, and information stored electronically contingent upon their prudent and responsible use. Access is granted to the individual and no individual can transfer or share access with another.

A user may not:

(1) use information or resources for any illegal or unauthorized purpose or act, including violating any state or federal laws or any established policies or procedures of the University or the Computer Science Department;
(2) participate in any behavior that unreasonably interferes with the fair use of other users or harms them in any way;
(3) use resources or information for commercial purposes. Misuse of computing, networking, and information resources may result in severe consequences; including the termination of access to these resources.
