1 Introduction (James Rice)

Thank you for your interest in the RocStar Application. RocStar seeks to improve the coordination and communication of the Roc Solid Foundation’s philanthropic efforts in support of pediatric cancer patients. RocStar will enable you to stay up-to-date on the Roc Solid Foundation’s endeavors, and make it easy for you to assist them in their mission.

Depending upon your role in interacting with the Roc Solid Foundation, you will be given specific permissions for RocStar application access. All users have access to create and edit a user profile. Roc Solid Staff members have the ability to coordinate budgetary concerns for project builds, communicate with all application users, and receive/action requests from hospitals for ready bags and new patient referrals. Roc Solid team leaders are able to coordinate builds they are overseeing, produce an inventory of materials needed, and communicate with volunteers for their projects. Roc Solid volunteers can coordinate with their project team leader and sign up for projects. Hospital staff users can access, and submit, electronically fillable forms to request ready bags for their facility, and refer new pediatric cancer patients to the Roc Solid Foundation.
