3.4 Using RocStar as a Roc Solid Volunteer (Roland Mulligan)

3.4.1 Home

The home screen gives volunteers the ability to donate to the Roc Solid Foundation with an easy-to-use “Donate” link. But, from there, they have access to the RocStar “Volunteer” sections of the application.

3.4.2 Notifications

RocStar’s built-in notifications system gives the volunteer the ability to communicate with the rest of the Roc Solid team. As stated before, communication is key to coordinating the volunteer process. The RocStar application makes it almost effortless to keep the volunteers connected. Enter the “Notifications” section from the homepage, and you are ready to go.

3.4.2.1 Receive Notifications

Volunteers will be allowed to receive notifications while using the RocStar application.

3.4.2.1.1 Acceptance of Project Volunteer

When a project becomes available, a request will be put out by the Roc Solid Foundation to volunteers in the area. When a volunteer receives this notification, they now know that an opportunity to help has arrived. If the project
is close, and the volunteer is available, they can accept and be put on the job immediately. Waivers are required to become a volunteer, and the application makes this effortless.

3.4.2.1.2 Project Team Leader Information

The notifications keep the project team leader and the volunteers connected. The RocStar application allows the volunteer get all the information about the leader of a given project.

3.4.2.2 Sending Notifications

When a project does show up, the application gives the volunteer the chance to sign up immediately. Everything is quick and easy with the RocStar application.
