

AJAX Poll Example

poll_vote.php

```
<?php
$vote = $_REQUEST['vote'];

// read content of textfile into an array
$filename = "poll_result.txt";
$content = file($filename);

// separate yes and no votes
$array = explode("||", $content[0]);
$yes = $array[0];
$no = $array[1];

// tally yes or no
if ($vote == 0) {
    $yes = $yes + 1;
}
if ($vote == 1) {
    $no = $no + 1;
}
```

array explode (string \$delimiter, string \$string)
Splits \$string into multiple strings delimited by \$delimiter

Result:

Yes:  57%
No:  43%

poll_result.txt

yes votes || no votes

35

AJAX Poll Example

poll_vote.php

```
// insert new tally to txt file
$insertvote = $yes . "||" . $no;
$fp = fopen($filename, "w");
fputs ($fp, $insertvote);
fclose ($fp);
?>
```

```
<h2>Result:</h2>
<table>
<tr>
<td>Yes:</td>
<td>
' height='20'
alt="yes" />
<?php echo(100*round($yes/($no+$yes),2)); ?>%
</td>
</tr>
```

Result:

Yes:  57%
No:  43%

poll_result.txt

yes votes || no votes
