

ONE-CLICK, USER INSTIGATED PRESERVATION

- “Archive Now!” button sets up crawl, initiates crawl and puts archive file in correct location to be indexed.
- Wayback consumption can be checked with “Check Archive Status” button.

- Once indexed, “View Archive” button shows all archives for URL in local Wayback.

- Selecting the date in local Wayback displays the preserved webpage.

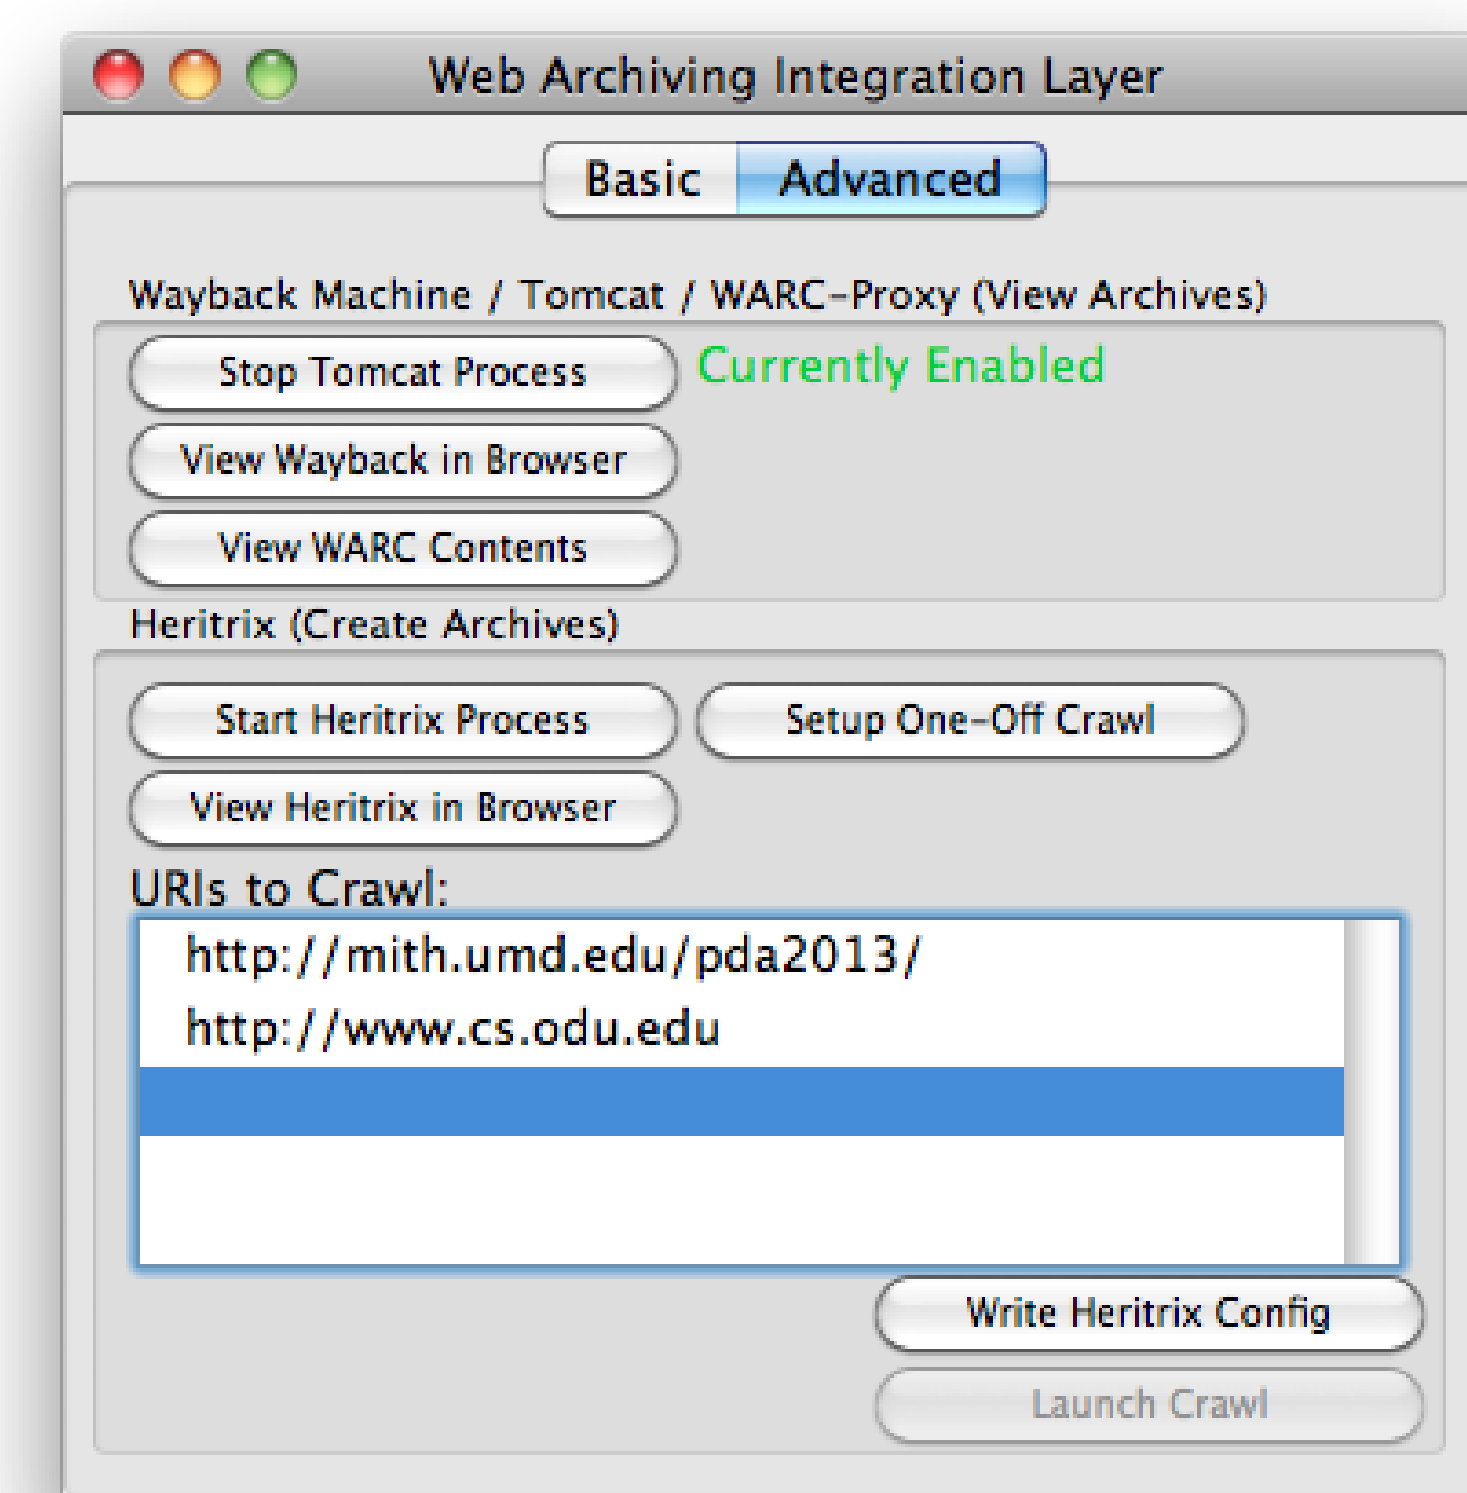

FEATURES

- Collection of Archiving Tools
- Drag & Drop Installation And Removal
- All Tools Can Reside on a Single Machine
- Managed Through a Graphical User Interface (GUI)

TOOLS INSTALLED LOCALLY

- **CREATE ARCHIVES:** Heritrix (Crawler)
- **REPLAY ARCHIVES:** Wayback Machine
- **INSPECT ARCHIVES:** WARC-Proxy
- More to Come!

INTERFACE FOR TWEAKING

SUPPORT

- **GENERATED ARCHIVES ARE SAFE**
Web ARChives (WARCs) reside on your hard drive, can be backed up for safe keeping like any other file
- **CROSS PLATFORM**
Support for MacOS X, Windows and Linux
- **WORKS WITH EXISTING WARCS**
Just drop in and local Wayback will index for replay
- **COMPATIBLE WITH OTHER ARCHIVING TOOLS**
Use the WARC-generating preservation tool of your choice (e.g., WARCcreate, Wget) in lieu of Heritrix

ADVANCED OPTIONS/FEATURES

- Specify Multiple URLs to be Included in the Crawl
- Setup Crawls and Allow for Customization Prior to Execution (e.g., crawl period)
- Start or Stop Services Not Currently Needed (e.g., initialize a long crawl but delay replay until later)
